INCIDENT MANAGEMENT SITUATION REPORT MONDAY, SEPTEMBER 20, 1999 - 0530 MDT NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION:

Initial attack activity was moderate in the Southern Area and minimal in the rest of the United States. New large fire activity was reported in the Eastern Great Basin Area. Large fire activity continued in California, Eastern Great Basin, the Northwest and Southern Areas. The National Interagency Coordination Center mobilized infrared aircraft, a helicopter, telecommunications equipment, a shower unit, engines and miscellaneous overhead. Very high to extreme fire indices were reported in Oregon, California, Idaho, Montana, Utah, Nevada, South Dakota, Illinois, Indiana, Georgia, Kentucky, Tennessee, and Texas.

NORTHERN CALIFORNIA LARGE FIRES:

BIG BAR COMPLEX, Shasta-Trinity National Forest. A Type I Incident Management Team (Dubois) and Type II Incident Management Team (Weltch) are assigned. The complex is 28 miles northwest of Weaverville, CA. The complex consists of the Megram, and Onion fires. The Megram fire continued to burn in the Soldier and Eight mile creek drainages to the west, Eagle Creek to the north and Slide Creek to the east. The southern portion of the fire is being tied into the road system between Quimby Creek and the New River drainage. Fireline is being constructed from Trinity Mountain to the north and is being supported by burnout operations at night.

INCIDENT NAME		SIZE % CTN								
BIG BAR COMPLEX	CA SHF	47199 55	UNK	1536	41	47	9	0	NR	15.8M

SOUTHERN CALIFORNIA LARGE FIRES:

KIRK COMPLEX, Los Padres National Forest. A Type I Incident Management Team (Greenhoe) is assigned to the Kirk Complex North, which includes the Tassajara, Five and Mountain fires. A Type II Incident Management Team (Smith) is assigned to the Kirk Complex South, which includes the Hare and Kirk fires. Unified Command with California Department of Forestry (Haines) is in effect. This complex is in the Ventana Wilderness, approximately twenty miles southeast of Carmel, CA. A successful burnout along Chews Ridge to the northwest was conducted during the night. Along the coast, in lower elevations, the fire has laid down due to the deep marine layer. This is allowing crews to make good progress on the indirect line. The Mountain and Snake fires are being monitored. Weather is expected to remain fairly serene until about Wednesday. Fireline construction and burnout preparation is proceeding.

INCIDENT		SIZE %								
NAME		CTN	CTN	PERS				LOSS	LOSS	C-T-D
KIRK COMPLEX	CA LPF	25200 16	UNK	3430	73	36	28	0	NR	16.1M

SOUTHERN AREA LARGE INCIDENTS:

HURRICANE FLOYD. An Area Command Team (Mann) is assigned. A Type I Incident Management Team (Melton) has set up a receiving and distribution center at Shaw Air Force Base. Three tractor-trailers with generators arrived.

FIVE MILE SWAMP, Florida Division of Forestry. This fire is in Santa Rosa County, FL. This will be the last report unless new information is received.

INCIDENT NAME			SIZE									\$\$\$ C-T-D
FIVE MILE SWAMP	FL	FLS	870	60	9/20	89 	0	 5	1	0	NR	NR

EASTERN AREA INCIDENTS:

HURRICANE FLOYD. A Type II Incident Management Team (Ferguson) has set up a receiving and distribution center at McGuire Air Force Base in New Jersey. Thirty counties have been declared disaster areas.

NORTHWEST LARGE FIRES:

INCIDENT NAME		SIZE % CTN							
ELK DRIVE	OR OCF	600 100		146	4	15 2	0	NR	NR
OCF = Ochoco	National For	rest.							

EASTERN GREAT BASIN LARGE FIRES:

INCIDENT NAME	ST UNIT 	SIZE % CTN		TOTAL						
GRANDVIEW	ID IFD	23730 100	 	15	3	6	0	0	NR	NR

IFD = Eastern Idaho Area, Upper Snake River District.

OUTLOOK:

Cool high pressure at the surface will produce moist, cloudy upslope conditions with areas of fog, drizzle and flurries from southeast Wyoming to northeast New Mexico. Cool return flow from this high will keep temperatures down across the entire Northern Plains region. Moist unstable air will continue to produce isolated to scattered showers and thunderstorms from the Sierra Nevada to Colorado and New Mexico with the most numerous and wettest around the Four Corners area.

Upper level warm high pressure combined with a surface thermal low pressure in the inland northwest, will maintain unseasonable warmth and low humidities in the teens and lower 20's.

The Gulf Coast states will have a high pressure aloft centered over northern Mexico, keeping it warm and dry across the southern half of Texas to Louisiana and Mississippi. Minimum relative humidities will range from 30 to 40 percent with only isolated afternoon thunderstorms. Low pressure over the eastern gulf of Mexico will continue to support scattered wet thunderstorms for Alabama and Florida with relative humidities staying mostly above 50 percent. A strong cold front will spread showers, isolated thunderstorms, cooler temperatures and higher relative humidities across northern Texas.
